Game Rules

Purpose of the game

The Empathy Card Game is using play to inspire mindset of growth and learning. Through play participants begin to confront and reflect on habits that may be restricting their connection to themselves and others. The game is about life, love, decisions, perceptions, style, meetings and little things we take for granted. A game that is simple, complex and awkward as you and your friends.

Playing the Game

Choose game Card Dealer or take turns selecting grey prompt card

Shuffle and deal each player 7 white cards

Its ok if the white cards don't fit with prompt card

This is where you come in and be you. Answer from heart without double thinking yourself.

Place your white card, your intuitive quick response, next to grey prompt card.

Once everyone has placed their cards down. Turn the cards up and go around the table. Every player explains the reasoning for selection of card.

Ask players to if they would like group 2 or 3 cards together. To build on top off each other reasons and transform the initial perspective.

Ask one member from the group to verbalize the shift from 1 card perspective to now cluster of 3-4 card perspective. For each round there will two sticky notes. Before Perspective. After Perspective.

Keep the played cards with sticky notes aside.

Select next Grey Card. Play continues.

Dear Politician,

Roads are repaved. How about some

in villages?
